	Product No.: 99530405								
	The Grundfos SCALA1 is a self-priming, multistage pump, that incorporates all the components of a pressure booster into a compact composite enclosure. As it is self-priming, the SCALA1 can pump water from a level below the pump.								
	Provided it is filled with water, the pump can lift water fi								
	This facilitates easy installation and start-up of the pur	p and provides	more reliable water supply in installations						
	where there is a risk of dry running and leakages in suc	such nose of pip	es.						
	SCALA1 can communicate with Grundfos GO app via I	ouilt in Bluetooth	n, which enables detailed pump monitoring and						
	high customization options, making this pump a good fi	it for every appli	cation.						
	SCALA1 incorporates advanced protection features su	ch as:							
	- Dry running protection that will automatically sto		ase of water shortage						
	- Cycling protection which will prevent pump start								
	<ul> <li>Max runtime protection can stop the pump after damage due flooding in case of pipe breakages</li> </ul>	a desired period	d of continuous operation, preventing potential						
	The pump has a built-in motor protection that will stop the pump if exposed to excessive temperature due to high ambient temperature, in case of seizure or overload, thus preventing a motor burnout.								
	With Grundfos GO you can easily setup SCALA1 as a	Twin booster sys	stem, operating as duty/stand by as well as						
	duty/assist. It is also possible to add external input con	troi and schedui	e a pump operation via calendar function.						
	SCALA1 require no maintenance, but it is recommende keep the ventilation holes free of dust.	ed to keep the pu	ump clean, check the non-return valves and
